

Good education marks the start of a fulfilled and successful journey out into the world. This needs to cater to individual strengths and weaknesses, inclinations and interests. FG Basel offers a sustainable school career and optional day school under one roof. Future-oriented forms of teaching and learning and a multi-faceted support and talent programme round off the FG Basel offering.

FG Basel

- recognises and promotes the skills of those with **savant syndrome**
- helps with overcoming **specific weaknesses**
- supports the targeted route to the **Swiss high-school-leaving qualification**
- has a school building with **modern infrastructure**
- offers **structured school days and a friendly environment** for the support of parents
- conveys **values and traditions** in a friendly environment

FG Basel offers a uniform and coordinated educational pathway under one roof: from nursery to the recognised Swiss high-school-leaving qualification or secondary school qualification with a certificate.

When designing its educational concept and offers, FG Basel uses the scope available to it to ensure innovative teaching that focuses on individual support as well as a pioneering day school concept. In classes that are usually comparatively small with less-noticeable differences in level, our pupils achieve their educational objectives reliably and determinedly thanks to talent-appropriate lessons, individual learning support and qualified teachers. This provides them with the best possible preparation for solid vocational training or a university degree. Additional benefits include precisely coordinated transitions and ease of movement between the individual school levels. Likewise, FG Basel can guarantee ease of movement with respect to the public school system. English is introduced at the nursery level, and at higher school levels, our pupils can acquire internationally recognised language certificates or the bilingual Swiss high-school-leaving qualification.

FG Basel is set up as a day school right through to the end of primary school. Additional hours can be used from Monday to Friday from 7:30 a.m. to 6:00 p.m. and compiled individually.

FG Basel school career

The broad range of options extends from care in the morning and lunch in the school canteen all the way through to workshops. In various courses and offerings, children and young people can further enhance their ability to act autonomously and social skills and can realise their personal talents.

For children and young people who join FG Basel with no German or very little German, an individually customised intensive programme is put together to promote their acquisition of German as the top priority until they can follow lessons.

In addition, through FG Fit to Learn and FG Coaching, the school offers personal support with learning and individual support that is also open to external pupils.

A supportive community

Strong relationships between pupils and teachers convey a sense of security and support learners in their day-to-day schooling.

Contacts gained at FG Basel often last a lifetime. Former pupils can take advantage of a network that extends far beyond the Basel region. Many of them remain associated with FG Basel, stay in touch with the school and can be encountered at school festivals, talks and events. The alumni association has an important role and is extremely active in ensuring that such contact is maintained.

Infrastructure as an important support

Modern infrastructure is indispensable and an important support for the enjoyment of school. FG Basel has its own big playground, a huge, modern three-court sports hall, laboratories for chemistry, biology, physics and IT, as well as fully equipped music rooms and band rooms. The in-house canteen team provides pupils with hearty lunches.

Security is a top priority

Easily accessible by public transport and surrounded by residential districts, the FG Basel site offers everything you need for a good school. In addition, FG Basel provides a friendly atmosphere and a large degree of comfort and security.
