

FG Grammar School

(Secondary P)

*Conquer the world through
strong relationships*

The grammar school at FG Basel takes seven years to complete. The first three years represent a preparatory phase (Secondary P). This means that pupils enter grammar school immediately after primary school. Classmates, teachers and infrastructure thus remain largely the same for seven years, and grammar school learning materials and methods can be introduced early.

Come to FG Basel's grammar school. Here,

- we will prepare you for grammar school in **demanding, subject-specific lessons** using modern teaching materials
- you will become part of the strong **FG family** where pupils and teachers work together as a team
- we will challenge and help you **individually** and with **personal learning support** to achieve your goal of gaining your high-school-leaving certificate
- you will learn **independence and personal responsibility** in action-oriented projects: learning by doing!
- you will benefit from the **infrastructure of a grammar school** with in-house high-school-leaving exams (subject teachers, laboratories, etc.)
- you will enjoy a **full school day** in your class group with a rich house culture, huge, three-court sports hall and an in-house canteen

Lesson content is based on the Lehrplan 21 curriculum and so guarantees a seamless transition between a state school and FG. You will take part in diverse projects in our special "Extended learning" teaching format. In our "Lernlandschaften", you will develop your ability to work independently and enhance your personal interdisciplinary working and learning skills. You will improve your time management and self-organisation in collaboration with your personal supervisor.

You have the option of bilingual lessons in subjects pertaining to the area of "science", among others. Some of the teachers teaching at grammar school level also teach their subjects during the preparatory phase.

At FG Grammar School, you will receive a graduation certificate for middle school after three years (including the assessment of your submitted work) at Secondary P level with a language diploma in English (PET/First/CAE) and French (DELFI), as well as a computing diploma (ECDL).

Additional offers

At FG Basel we offer an extensive range of **supervised work, workshops and support options** (subject to a charge) that make use of the grammar school's full infrastructure.

Taster days at FG Grammar School are possible at any time. We will be happy to provide you with information about all educational aspects and present the school to you. We look forward to meeting you:

FG Grammar School

*Conquer the world through
strong relationships*

At FG Gymnasium, we prepare you for your ongoing academic journey. Our focus is on an individually customisable offering with major, supplementary and optional subjects, support and personal help. Experience has shown that the relationships established at FG Basel with teachers and fellow pupils will last a lifetime.

At FG Grammar School,

- we will support and challenge you through an **ability-focused and talent-based approach**
- we will prepare you in a **focused** manner for university
- through cross-subject offers, we will develop a capacity for **interdisciplinary thought and actions**
- we will jointly establish the skills and **autonomy** required for your ongoing academic journey
- we will offer you diverse choices for **customised education**:
 - **Major subjects:**
 - Artistic design
 - Biology and chemistry
 - Music
 - Physics and applications of mathematics
 - Spanish
 - Economics and law
 - **Supplementary subjects:**
 - Applied IT: media and communication
 - Biology
 - Biology and sport
 - Pedagogy and psychology

Teaching at FG Grammar School focusses on current topics, with particular emphasis given to independent work, social integration and the identification of one's own skills and abilities. In this way, we pave the way for a successful future for our pupils. With the help of our pedagogical concept, we promote interaction with current societal changes and the new demands made on students studying for their high-school-leaving certificate (teamwork, autonomy, handling of complex problems). Pupils get the chance to help shape their path towards their Swiss high-school-leaving qualification themselves. For this purpose, we offer projects that extend across subject, class and year-group boundaries, themed days and optional subjects.

After acquiring their recognised Swiss high-school-leaving certificate, pupils from FG Basel go on to study at all Swiss and many foreign universities.

Bilingual high-school-leaving qualification

Choice of the bilingual high-school-leaving qualification track means that lessons in the subjects of biology, geography and physics take place in English. Teaching takes place using the immersion method and is carried out by native speakers.
