

# FG Fit to Learn FG Coaching

*Making goals easier to reach  
through individual support*

**Through FG Fit to Learn and FG Coaching, we offer individual support and assistance to pupils, students and professionals with their learning and acquiring or refreshing their knowledge and skills. The programme is also open to interested individuals who do not attend FG Basel.**

- In **FG Fit to Learn**, we fill subject-specific gaps and consolidate or expand existing knowledge.
- In **FG Coaching**, we work on and improve individual learning strategies to enhance performance.

Both programmes are particularly well suited to exam preparation, the acquisition of new subject knowledge or refreshing existing knowledge and catching up on missed content.

## **Range of topics**

FG Fit to Learn is offered in practically all areas of expertise and academic subjects. Written, oral and practical elements can be practised and consolidated.

FG Coaching supports and assists pupils so they can refine their working and learning methods, handle concentration problems, search for motivation in learning and improve time allocation and planning.

## **Objective**

The top priority with FG Fit to Learn and FG Coaching is to achieve the desired objectives as quickly as possible. For this reason, pupils and teachers usually discuss each month whether the chosen methods are likely to bring success.

## **For all learning types**

FG Fit to Learn and FG Coaching consist of one-to-one lessons. This enables the maximum level of individuality as the specialist can enter into specific individual needs in full and promote strengths. In this way, we achieve rapid progress and the greatest possible benefit for participants.

## **Holidays**

We also run FG Fit to Learn and FG Coaching during school holidays by prior agreement. This enables an intensive focus on one subject or topic without day-to-day distractions.

## **Duration and cost**

The duration and frequency of the lessons depends on the needs of the individual pupils. We generally calculate lessons in 10-minute increments.

Do you wish to take advantage of the benefits of individual support for you or your child? Arrange an appointment for your personal consultation:
